MECHANICAL EXFOLIATION:

- **Microdermabrasion**

This treatment is recommended for most skin types. Our microdermabrasion treatment reduces the appearance of fine lines and wrinkles, improves skin texture and color by removing the top, outer most layers of the skin.

Microdermabrasion, (skin resurfacing,) stimulates skin cells beneath the surface of the skin resulting in a vibrant and firmer appearance. This treatment can also be used in combination with one of our peels for more dramatic anti-aging results.

30 mins \$100

- **Dermaplaning**

This treatment uses an exfoliation technique that dates back to Ancient Egypt. Our dermaplaning treatment is recommended for most skin types and works to refine the epidermis, the outer most layer of the skin, through a gently controlled scraping technique. Dermaplaning removes dead skin cells, vellus hair (peach fuzz,) and fine lines as it stimulates collagen, and rejuvenates the skin.
